Project information sheet #2

Lowmead Bridges Replacement

JOHN CLIFFORD WAY - HOBBLE CREEK CROSSING (bridge closed until mid-July)

Thank you for your co-operation while we undertake John Clifford Way - Hobble Creek Crossing bridge replacement.

In the past week, there has been a lot of activity on site with piling and bridge demolition works and placement of scour rocks.

WHAT'S BEEN HAPPENING?

- **28 March 2022 - 2 April**
 - Concreting works of the bridge abutments

UPCOMING PLANNED WORK:

- **Mon 4 to Fri 8 Apr:**
 - Earthworks and backfill behind abutments.

WHAT TO EXPECT?

- **Detour** – via Clarkes Road while bridge construction is underway.
 - In addition to normal scheduled maintenance works, Clarkes Road has been scheduled for regular condition inspections and will be graded and maintained during the construction period and after rain events.
 - Please drive to road conditions, be mindful of increased traffic on Clarkes Road, allow for longer travel times and be aware of the possibility of cattle, on or near the road.
- **Heavy vehicles** - The project does not involve continual heavy vehicle use however there will be heavy vehicles transporting materials and at times several trips will be made to and from the project site throughout a day.
 - At times larger vehicles will be reversed into the project site.

A new durable bridge structure will improve safety and user experience with quieter and smoother travel, greater load capacity and reduced need for maintenance.

This project is jointly funded by the Federal Government's Department of Infrastructure, Transport, Regional Development and Communications' Bridges Renewal Program Round 4 and Gladstone Regional Council.
