

15 June 2020  
PROJECT UPDATE NO.5

---

## Boyne Tannum Aquatic Recreation Centre

---

At the 2 June 2020 Council General Meeting, Council made the below resolution regarding the Boyne Tannum Aquatic Recreation Centre;

*That Council;*

- 1. Adopt the recommendations of the Boyne Tannum Aquatic Recreation Centre Options Analysis and select Lot 900 Coronation Drive as the preferred site for the development of the Boyne Tannum Aquatic Recreation Centre; and*
- 2. Review and refine the Preliminary Master Plan and proceed to Concept Design of the facility; and*
- 3. Inform the community of the Master Plan and next project phase.*

As such, Council has committed to a preferred development site and will now proceed to the next project phase. The Concept Design phase will further refine the adopted Preliminary Master Plan to determine staging of the development and the associated capital and operational costs with each stage of the development.

If you are receiving this Project Update, you have likely indicated your preference in the community survey carried out in early 2019, to receive project updates. Council has since launched its online engagement platform, *Conversations*, that will be utilised to provide project information and updates on the Boyne Tannum Aquatic Recreation Centre. As such, this will be the final Project Update delivered in this format.
